

Attention Hong Kong Police Detectives

I request police to investigate this SMS. This SMS proves that an international organization of murderers for hire operates in Hong Kong. My concern is that organization will continue to murder and threaten.

The SMS attached below proves:

1. I was also poisoned in Philippines standing inside the Manila bureau. This SMS proves they knew I was poisoned with a concoction of LSD and toxin that time, is why the message included information relating to such a hallucinatory experience.
2. This SMS also included information about “the David” whom I wrote about in e book before I entered Hong Kong. This proves they tracked me to Hong Kong and illegally took control of another strangers phone outside my quarantine hotel.
3. This SMS states that the David is CIA, also proves there is a link between them and the American government. I witnessed this organization use a network of private security contractors, State Department investigators, CIA, NSA, and criminal organizations.

I found this bank trust account only after this organization told me about it in the Philippines; therefore, I must be telling the truth because it came true. By law, my family trustee was supposed to notify me in writing about the bank account, but they never did nor

did they tell me about it. I hired a lawyer in 2019 who found it. Monies sent to me before that were gifts, I was told.

Then something else turned out to become true after I wrote about several instances of the NSA. Then I followed that money into the account and discovered an email address, this one CGREENWALD1@VERIZON.NET. Then I followed that email to <http://ccnationalecurity.org>. Carol Greenwald is just one of many people inside my parents network. These include government people who had the power to influence major government decisions, surveillance, assassination, and international clandestine activities. My father also worked for the American government and CIA people.

Letter in Support of Me

Letter in Support of Larry Margulies
Submitted by Nguyen Weeks
October 17, 2022

My name is Nguyen Weeks and I work in an Organizational Development Department that supports the leadership and development of Healthcare workers across the State of California. I possess a Bachelor of Science in Marketing Communication from Emerson College and a Masters in Public Administration from the University of San Francisco.

I have known Lawrence “Larry” Yudowitz for 34 years. We met while in a mutual class together in the 10th grade. Although decades have passed, we remain in contact and remain friends.

In addition to our friendship, it was customary for my mother to meet all of my friends. She believed that all my friends were a part of a network of people she wanted to be engaged with. Larry met my mother on numerous occasions and they would engage in thoughtful, and heartfelt discussions while we were in high school and beyond.

It is my understanding that individuals in his family are attempting to state that he has mental health issues that impact his ability to think, live or build a life for himself. In all of the years I have known Larry, I have never known him to exhibit mental health challenges outside of the typical youth and young adult

development phases and experiences that shape the lives of young people.

My second interaction with his father made me ponder about how children create behaviors to deal with traumatic situations in their lives and what impacts a household with excessive controls produces.

On the second visit to see Larry, I brought a family friend (Odessa) who resided in Newton, a neighboring town, to come socialize. On this particular day, as we rode through the back roads, which were dark because it was past sunset and because it was heavily shaded, Larry spotted his father's car and he froze and pulled over on the side of the road. My friend and I had no idea what to expect at that moment. Larry walked over to his father's car and they started to argue. When Larry got back into the car, his father took his Cadillac and rammed it into the side of the Saab on the passenger's side. This seemed erratic and extremely scary because we were in a very remote location, we did not really know his father and there is a car being used against another car. My friend and I got out of the car and Larry's sister got into the car and drove away. Larry's father told us that we should go home. As we walked (45 minutes) to the closest train station, we were bewildered that his father would show this level of violence, and it was in public, although whether in private or public, I did not feel it was merited, nor a productive way to get to the end result he was hoping for. As a person outside of the family, it was shocking, harmful and I would even go as far to say traumatic. My friend and I were bewildered and fearful of Dr. Yudowitz. We wondered what the real life implications were for Larry especially when at this phase of life it is customary for teenagers to express more of their independence and question those in authority.

Despite that experience, it was clear that Larry had a dichotomous relationship with his father. On the one hand, he absolutely revered him and respected his accomplishments, and at the same time, there was always an underlying theme of fear woven into the relationship. Larry always sought the love, nurturance, and guidance from his father, but the relationship was strained and it had its limitations.

Larry has always been a kind individual, who when motivated, wil

put his all into what he wants to accomplish. Larry can be pensive and thoughtful about his interactions. He has always taken chances where others may be more risk averse, whether it's business or travel. Larry is also resourceful and a strategic thinker who has ventured across the globe making relationships and building a life that affirms who he is and what he wants to do in the world.

It is my belief that during his childhood, Larry faced traumatic experiences that shaped him, that required coping strategies, but even with that, he is a person that would go against the grain - challenged what he thought was not right, questioned the notion of blind acceptance of harmful behaviors and actions by authority figures and has charted a life that allows him to build the life he wants.

Pst. 720 (Rev.)

Note. One Chinese police officer has information. He got a phone call asking for my English description while we bused across the Macao border, then processed visa, in the gymnasium on 2019 03/03.

12. Note. There is an English school head master at Edens Language School. who was my friend and received a package from America with my identification card. An American investigator followed that package to his office and he introduced himself to my friend. Those people also attacked me in that city, and these same people stole my passport in Guangzhou in 2019.

The Beginning

Around 2012. Threats and assassination attempts in Hong Kong. Two men sat at my table and said they “were going to kill me”. I called my father right away, and he told me exactly what I said to those men, proving he had them sent. I was physically attacked that week and taken by security from the Mandarin Oriental Hotel to get 13 scalp stitches at the Hong Kong hospital.

(After Hong Kong they followed me into the USA, Canada, the Philippines, China, Macao, Mongolia, and UAE. These people tracked airplanes, bank card usages, family mail parcels, and my per-scheduled appointments.)

(I spoke with a Jonathan Benny on the phone in Hong Kong that same week of the attack. He acted very suspiciously. Benny later called my parents home looking for me when these assassination attempts happened. I befriended that CIA agent alias Jonathan Benny using Taiwan and Nigerian passports. He told me he was Diplomatic Security Services, and another reliable source Elissa Russel in Taiwan told me he works for the State Department) but upon reporting my pick pocketed passport in Guangzhou 2019 the real diplomatic security investigators told me Benny would have to be CIA because he had a chloroform sales license. He is already recorded with the Chinese government so I am not disclosing secret information.)

I discovered myself through reports from Benny and another way by my father's personal liaison to the State Department. My father had strong relationships within the State Department for reasons including his patient was a royal princess. My father lied about my health and labeled me a criminal as well to the State Department

during a mutilated passport investigation 2008 and also during a repatriation loan application in 2014.

I learned of the passport investigation against me from a government worker inside the Boston passport agency during pickup for my passport in 2010. I learned about this investigation soon after the assassination attempts began. The American patriot act may have been used as a legal maneuver to assassinate me because these events occurred during the passport investigation

One officer at the Manila Consulate in 2015 did research and found out before telling me there was a “warrant on my life”. This proves government involvement.

They pick pocketed my passport in 2019, perhaps because the statues of limitations ended for the 2008 mutilated passport, and they needed cause to continue legally.

It May Help Investigators to Know the Following

In 1991 I witnessed my father admitting his involvement with the murderer and FBI informant Whitey Bulger. He used “Whitey” as a tool to “fix problems”. Whitey murdered while handled by the FBI.

In 2015 My mother admitted to me about her communications with the killers on the phone while I escaped several assassination attempts within one month between Cebu, Bagiou, and Manila, 2015.

I was several times swatted in Canada. The police there told me this. At that time my father was receiving messages on his home phone about my life in Canada through surveillance.

My mother has a history of negligence and abuse, also lying. Her psychiatrist would confirm, but he died. I spoke with him before he died about my mother and he confirmed her mental problems. It is sad but true she will tell lies about me now to protect herself like always. One lie she tells is she says I suffer mental illness. I am actually very healthy and my numerous tests, personal doctors, so too my friends prove this anytime.

1980's My brother Martin was also in psychiatry for trying to kill me when I was only a child with his baseball bat and other times.

1991 My sister Ann has been in my dad's car when he rammed it into mine with two women inside. These girls have come forward to state that my father had insane violence and paranoid behavior.

I caught Martin in phone contact with this group of killers while I visited Macao in 2016. Martin was beginning to ask me for my information in China when the attacks began. My father asked Martin to hack my emails during a three way call we had. Martin admitted to helping my father "take care of me", he said this during the same time these people said the exact same thing to my girlfriend in her statement. In America we say this sort of thing to kill someone and avoid being overheard. It is evident Martin is lying to the public in order to fulfil his narrative that I have some sort of mental illness, and that is why the SMS proves a link between the poisoning in Manila with these people and David whom my parents sent.
